FOREWORD

The National Guide To College And University Programmes is published by the Canada Employment and Immigration Commission to assist those who are planning to enter college and university identify and select suitable educational or training programmes and institutions.

Many students are uncertain about their long-term interests in terms of future work activity or have not established any relationship between work activities and educational programmes. The programmes presented in this publication are identified by the exact titles used by the institutions that offer them. These programmes are listed and arranged in conformance with the occupational classification of the Canadian Classification and Directory of Occupations (C.C.D.O.). This Guide thus provides a link between the college and university programmes and the world of work.

ACKNOWLEDGEMENTS

The Canada Employment and Immigration Commission wishes to acknowledge the contribution of the many individuals, both inside and outside the Commission, for assistance in preparing this publication, and in particular that of the post-secondary institutions which provided the essential information.

AVANT-PROPOS

La Commission de l'emploi et de l'immigration du Canada publie "Le répertoire national des programmes des collèges et des universités" afin d'aider ceux qui prévoient s'inscrire à un collège ou une université, à identifier les programmes et les établissements d'enseignement qui les intéressent et à choisir les plus appropriés.

Plusieurs étudiants sont incertains au sujet de leurs intérêts à long terme, spécialement en ce qui touche leur futur emploi, ou ne voient pas le lien qui existe entre le monde du travail et celui de l'éducation. Cette publication présente les programmes sous la même désignation que les établissements qui les offrent. Les programmes sont énumérés et catalogués selon la Classification canadienne descriptive des professions (C.C.D.P.). Ce répertoire fait donc ressortir le lien entre les programmes des collèges et des universités et le monde du travail.

REMERCIEMENTS

La Commission de l'emploi et de l'immigration du Canada tient à exprimer sa reconnaissance envers les nombreux collaborateurs, tant de l'intérieur que de l'extérieur de la Commission, qui ont participé à la préparation de cette publication. Elle veut remercier en particulier le personnel des établissements d'enseignement postsecondaires qui lui ont fourni les données essentielles.

INTRODUCTION

The information in The National Guide To College And University Programmes was compiled by the Canada Employment and Immigration Commission to help those who are entering college or university and are in the process of making their selection of programmes and institutions. Along with other products of the Canada Employment and Immigration Commission - such as CHOICES - The National Guide To College And University Programmes has been designed as part of an information package to assist individuals in making career decisions.

To consider a programme at a college or university, one must first make a selection from among more than 10,000 programmes that are offered by post-secondary educational institutions in Canada. To help users make an effective selection, this publication presents the following:

Section A:

An alphabetical listing (English and French) of programme titles to help individuals identify and associate educational and training programmes with particular institutions.

Section B:

An alphabetical list of programme titles compiled by occupational area within each institution.

PREFACE

Les informations fournies par la présente publication et dressées par la Commission de l'emploi et de l'immigration du Canada ont pour objet d'aider ceux qui veulent s'inscrire dans un collège ou une université et qui cherchent un programme d'études et une maison d'enseignement postsecondaire répondant à leurs besoins. De même que d'autres produits de la Commission de l'emploi et de l'immigration du Canada - à savoir CHOIX - cette publication a été conçue comme un élément faisant partie d'un ensemble visant à aider dans le choix d'une carrière.

L'étudiant désireux de poursuivre sa formation au postsecondaire doit, de prime abord, choisir parmi quelques 10,000 programmes offerts par les maisons d'enseignement du Canada. Afin d'aider les utilisateurs à faire les choix qui leur conviennent, cette publication présente les données qui suivent:

Section A:

Une liste alphabétique des programmes (en anglais et en français) qui aidera les utilisateurs à identifier les établissements qui offrent ces programmes.

Section B:

Une liste alphabétique des programmes, par domaines professionnels, selon les maisons d'enseignement.

HOW TO USE THIS PUBLICATION

To Select An Institution When You Have Decided On A Particular Programme:

Consult the Alphabetical Listing of Programme Titles (Section A), select the programme of interest and note the code preceding the programme title. This code refers to the occupational area under which this programme is classified. Every programme title is followed by one or several alpha-numeric codes, each designating the province and the institution(s) within that province that offer(s) the programme.

To Select A Programme When You Have Decided To Attend A Particular Institution:

Locate the institution in Section "B". All institutions are listed alphabetically by province. You will find the name, the address and the telephone number of the institution of your choice, as well as all programmes offered by the institution. The programmes are listed alphabetically within their associated occupational area. Programme durations and levels are given for each programme listed.

For further information, refer to the institution's calendar to decide on the programme's suitability.
